

Udemy UX Report

Introduction

Udemy is an online learning platform that offers a multitude of different courses across many different topics. It is relevant as it is an online learning platform. This UX report aims to explore and define the strong suits of udemy as a website and how it can be used to improve our website. There is a focus of the Peak-End Rule in this report.

Website Overview

The website flows in its navigation. A user would browse for a topic they are interested in or explore new topics through the explore feature. Once a desired course is found the user would purchase either the course itself or sign up for a monthly subscription that makes multiple courses available. Once a course is signed up for the user is given access to the lectures of the course and a progress bar to track their progress. Once a course is complete the user gains access to a credential from the website/course.

UX Study Method

There were 4 participants in this UX study. The participants were required to navigate through the website and complete the shortened UEQ questionnaire.

UEQ Results

obstructive	o o o o o o ●	supportive
complicated	o o o o o ● o	easy
inefficient	o o o o o o ●	efficient
confusing	o o o o o o ●	clear
boring	o o o o ● o o	exciting
not interesting	o o o ● o o o	interesting
conventional	o o ● o o o o	inventive
usual	o ● o o o o o	leading edge

Udemy scored highly in being supportive, easy, efficient, and clear to use. The website has a clear layout and is easy to understand and make use of.

Udemy scored middling in being exciting and interesting. The website doesn't bring in too many exciting elements and mainly sticks to the already established layout of similar academic course websites.

Udemy scored low in the aspects of being inventive and leading edge. This website does not introduce any new ideas or concepts that would set it apart from the industry standard.

Peak-End Rule Analysis

The peak of Udemy is the "Let's Start Learning" section that is prominently displayed at the top of the website and gives recommendations to the user on other courses/articles that are available.

The end of Udemy is a positive one in the awarding of certificates upon course completion. By being awarded a certificate it both gives a sense of legitimacy to the website and a sense of accomplishment to the user.

Strengths and Weaknesses

Strengths:

- Clear navigational path
- Conveys feeling of achievement once course is completed
- Clean and easy to understand interface
- Large variety of courses

Weaknesses:

- Difficult to view recommendations
- Bland overall

Design Guidelines

Make course completion feel like an achievement and give proper recognition to course completion. Provide clear feedback for major actions. Use a clear visual hierarchy. Emphasize milestones as the course is completed. Create memorable moments throughout the course. Provide extra resources while doing the course. Ensure that a clear impression is left upon completion of a course.

Conclusion

Udemy is an easy to use but uninspired website. It serves to complete the proposed task of completing courses without adding any new innovations, this can be seen in both a good and bad way as it allows all users to understand the website while inviting the possibility of disappointment for more experienced users. The clear navigation and flow of the website is something that should be emulated in our site.
